

Name _____

My Dog Safety Book

Dogs are lots of fun, but they are also animals. Like any animal, they can be dangerous

Pay attention to how a dog is behaving. Dogs can't use their words like people can, so we have to watch their behavior. Stay away from dogs that look hurt, sick, or angry. What are the signs that a dog is hurt, sick, or angry?

3

Never play with dogs without an adult around. Always make sure the dog's owner is right there before you pet it.

4

If it looks like a dog wants to get you, don't run. Just stand still like a tree. Usually, the dog will lose interest and walk away.

5

If a dog ever attacks us, we should curl up in a ball. Tuck your knees up to your chest, bury your head into your knees, and cover your face with your hands. Lie as still as you can. This is called the fetal position, and you can try it now if you'd like. It will keep you from getting hurt badly!

The end.
