

There are all types of touches that people can enjoy... mommy touches, daddy touches, grandma touches, grandpa touches, friend touches, auntie touches, baby touches, horsie touches. People who care about you like to touch and show affection in all sorts of ways, and you probably like to do the same with people you love. Touching and nuzzling and showing all sorts of affection with each other is a wonderful thing, and something everyone should do. Just know that if it gets too uncomfortable, it's alright to tell an adult you'd like them to stop. Also, never keep anyone's touches a secret. Touches are for the whole world to see. Now quick, go kiss a horse!
