

COLOR N' LEARN SAFETY
www.KeepYourChildSafe.org

Whenever you're out and about after dark, be sure to carry a flashlight with you. Not only does it help you see, but it helps cars see YOU. You may not know this, but people become almost invisible at night from inside a car's windshield. Drivers can't see them until the last minute. So always make sure cars know that you're around, and walk with a flashlight at night. That includes you, too, Mom and Dad!
