

Crawling Under The Smoke

(Gross Motor)

Use a large white or gray blanket or bed sheet for this activity. Have some other kids hold the bed-sheet waist high, and shake it up and down like a parachute. While they are doing this, have the other children take turns crawling underneath the 'smoke'.

Finding 911

(math)

Cut out a whole bunch of numbers onto construction paper. Use the numbers 1 through nine. Spread them apart on the table, and have the children pick out the numbers 9-1-1 and glue them onto their own piece of paper. Talk about what they can use this number for.

Fire Prevention Badges

(Language)

Make fire prevention badges for your children to wear. Cut out pieces of construction paper in the shape shown below. Have the children write in their name, and decorate their badges with markers. Use a safety pin or masking tape to attach them to their clothing.

I FOUND MATCHES

(Music)

(Sung to "Skip to my Lou")

I found matches, what do I do?
I found matches, what do I do?
I found matches, what do I do?
I know just what to do.

Give them to a grown up, that's what I'll do!
Give 'em to a grown up, that's what I'll do!
Give 'em to a grown up, that's what I'll do!
Give 'em to a grown up.
