## Touch

If you ever find a gun laying around, don't **touch** it, and tell an adult right away. You should always assume any gun you find is real and loaded, until an adult tells you otherwise.

## Leave

If you're ever around a friend who wants to play with a gun, **leave** the area immediately and tell an adult. When kids play with guns, it's often other kids nearby who end up getting shot!

## Spark

A bullet is the projectile that fires from the gun. Many kids don't realize that bullets can be dangerous even without a gun. If a bullet is held to a heat source or struck in a way that makes a **spark**, a bullet can fire all on its own!

## Shoot

Guns can sometimes accidentally discharge, which means they **shoot** without someone pulling the trigger. Sometimes this happens if they are bumped against something, or if the trigger snags on clothing. Just another reason you should never handle a gun: they are dangerous!

## Friend

The newspapers are full of stories of adults who have accidentally shot themselves or a **friend**. If even adults have gun accidents, imagine how dangerous they would be for kids to handle!
