Projectile

A bullet is the **projectile** that fires from the gun. Many kids don't realize that bullets can be dangerous even without a gun. If a bullet is held to a heat source or struck in a way that makes a spark, a bullet can fire all on its own!

Accidentally

Guns can sometimes **accidentally** discharge, which means they shoot without someone pulling the trigger. Sometimes this happens if they are bumped against something, or if the trigger snags on clothing. Just another reason you should never handle a gun: they are dangerous!

Imagine

The newspapers are full of stories of adults who have accidentally shot themselves or a friend. If even adults have gun accidents, **imagine** how dangerous they would be for kids to handle!

4. _____

Otherwise

If you ever find a gun laying around, don't touch it, and tell an adult right away. You should always assume any gun you find is real and loaded, until an adult tells you **otherwise**.

4. _____

Immediately

If you're ever around a friend who wants to play with a gun, leave the area **immediately** and tell an adult. When kids play with guns, it's often other kids nearby who end up getting shot!
