## Inward

Whenever mom or dad are cooking on the stove, remind them to turn the pan handles **inward**, so that little kids don't grab them. If mom or dad forget, remind them!

## Outside

Whenever you go **outside**, remember to always shut the door behind you! Little kids might want to follow you, but if they slip **outside** without mom and dad noticing, they could get themselves into danger and wind up getting hurt.

## Objects

Little kids can choke on small **objects**. Pretty much anything that fits through a toilet paper tube can be a hazard. So make sure you pick up small things around the house, and help mom or dad watch what little kids put in their mouth!

## Mistake

Little kids can **mistake** medicine for candy, or they might find some and eat it because they want to do what adults do and don't understand the danger. So it's important to keep all medications locked up where little kids can't get them. If you find medicine laying around, tell an adult so they can put it away!

## Airway

Many foods can present a choking hazard to little children: Hot dogs, grapes, prunes, and some types of candy can block their **airway**. So before sharing something with baby, always check with an adult first to make sure it's OK for them to have!
