**There is all sorts of fun to be had on the water.
But it's important to have it safely.
Color the picture on the other page and then answer these
questions:**

1. What is something you need to put on your skin before heading out?

2. These kids are wearing their life jacket even though they know how to swim. This is because if an accident occurs, they might hit the water and get knocked silly. If this happened and they were unconscious or had a broken bone, how might wearing a life jacket save them?

3. If that boat tipped over or sank in the middle of the lake, they might have to swim a long way to get back to shore. What might happen if they weren't wearing a life jacket?

4. Summers on the lake, stay safe from boats by staying inside the floating marker bubbles. What might happen if people swam outside the marked areas?
