Oh no! It looks like this girl has been caught outside, and a tornado is headed right towards her! In order to be safe, she needs to get herself underground, or at least find someplace where she can lay down low in the earth. That will protect her from flying debris.

Pretend you were in this position. In the spaces below, write down where you could go to be safe from a tornado.

1. If you were in your own home.:

---

---

---

2. If you were out in an open field:

---

---

---

3. If you were riding your bike around the neighborhood:

---

---

---

4. If you were at a friends house:

---

---

---

5. If you were walking through town:

---

---

---
