In a fire,  
where does the  
heat go?

High,  
High.

In a fire,  
where do you  
need to be?

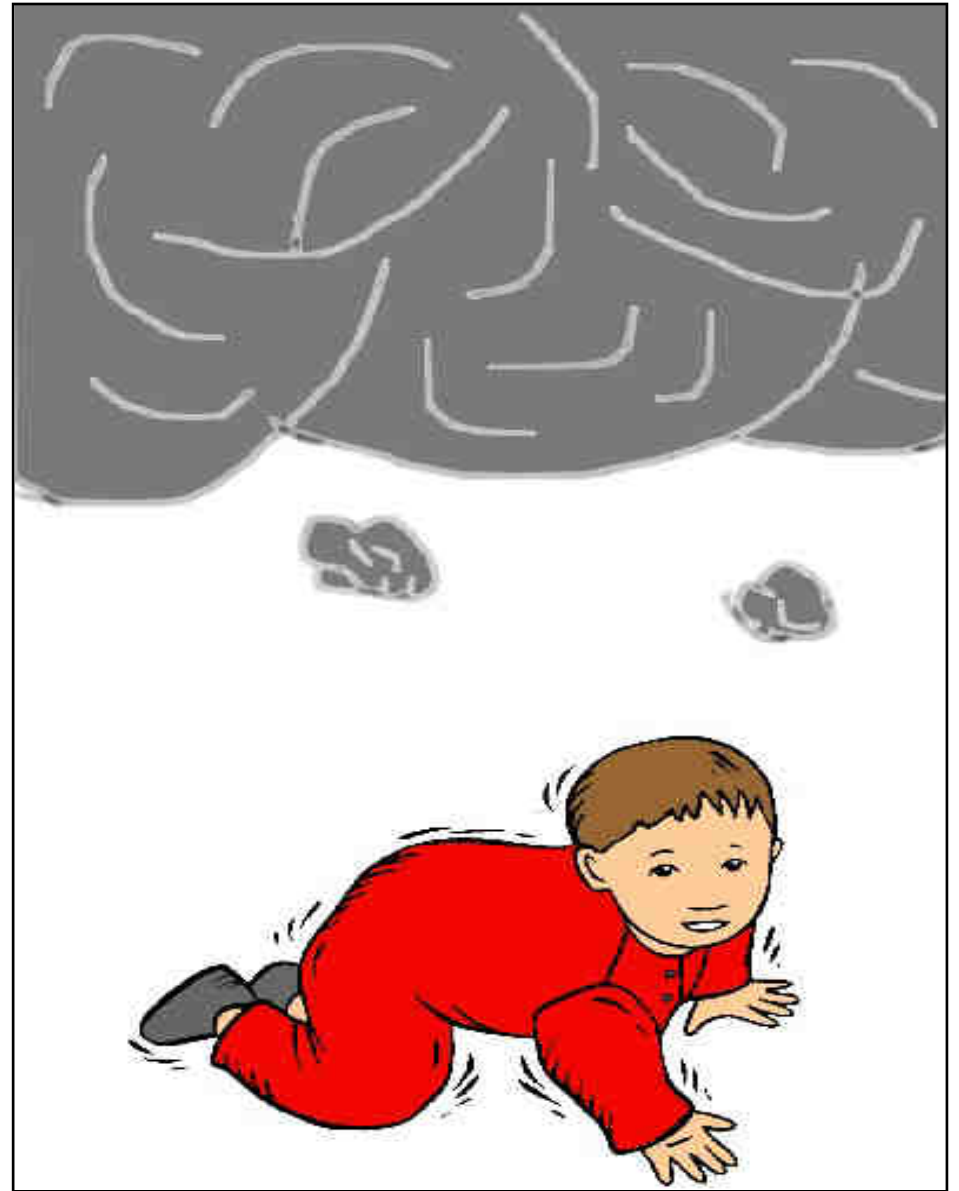

Low, Low.

In a fire,  
where does all  
the smoke go?

High,  
High.

In a fire,  
where do you need  
to be?

**Low, Low.**

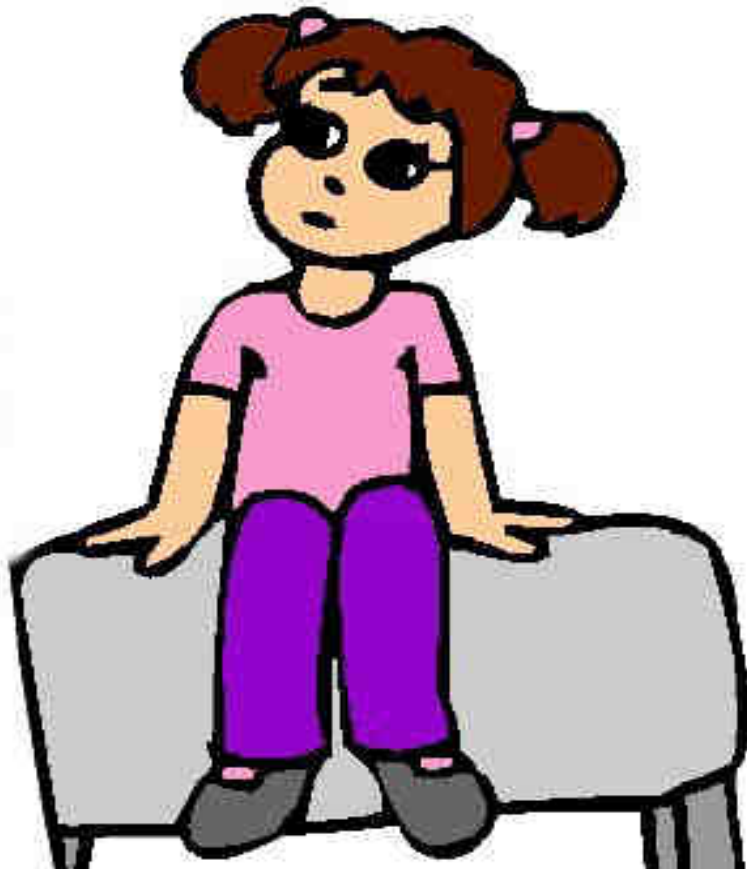

In a fire,  
what is  
burning?

Your house,  
Your house.

In a fire,  
where should you be  
headed?

Out of the house,  
Out of the house. 6

In a fire,  
it can  
spread very....

Quickly,  
Quickly.

In a fire, what should  
your first concern be?

Get out  
immediately,  
Get out  
immediately.

In a fire,  
who is your best  
friend?

Firefighters,  
Firefighters.

In a fire,  
what is it you should do?

**Go to them,  
Go to them,  
And that's the end!**
