Psychology Spelling & Vocabulary Words

Read each of the spelling / vocabulary words listed below and the paragraph beneath them, then practice writing each word in the spaces provided.

1. Brain

The lump of gray matter in your head that many people don't use as often as they should. Your brain is filled with cells and neurons that communicate using electrical signals, giving you thoughts and memories.

1. _____ 2. _____ 3. _____

2. Mind

The collection of thoughts, memories and experiences conjured up by your brain.

1. _____ 2. _____ 3. _____

3. Sane

To have a healthy, stable and sound mind. The opposite of sane is insane...like when grandma puts on rap music and tries to break-dance.

1. _____ 2. _____ 3. _____

4. Ego

Ego is the opinion one has of themselves. A certain amount of ego is healthy, but too much becomes obnoxious. Do you know anybody with too much or too little ego?

1. _____ 2. _____ 3. _____

5. Bias

To hold pre-formed thoughts, ideas or beliefs about something or someone. People can hold positive bias (like assuming you're awesome at everything) or negative bias (like thinking girls can't be good at sports).

1. _____ 2. _____ 3. _____
