Trust

Trust is the belief that someone is good, honest, reliable, and so forth. It's about having faith that a particular person will do what's right, do what's needed, or treat us fairly. Trust is an important part of social relationships. We all put our trust in others on a regular basis, and if there was no trust, society would break down.

Describe a way in which you put trust in others: _____

_____

Describe why trust is so important in your own words: _____

_____

What type of things build trust? _____

_____

_____
