Dear Teacher or Administrator,

This letter is being handed to you right now, most likely by the parent of one of your students. It is to let you know about a valuable safety resource for your school or childcare facility.

As someone who works with kids, you have the opportunity to make a huge difference in the fight for child safety, simply by incorporating it into your everyday classroom activities. At the website www.keepyouchildsafe.org, we offer a variety of free safety resources to help with this task, including work-sheets, easy reader books, lesson plan activities, and even a collection of free eBooks that can be accessed online. We also offer free safety articles and parent handouts that can be passed out to parents directly or used in your monthly newsletters.

We encourage you to check out our site at your earliest convenience. You will find that using these safety resources in your classrooms will add another high quality criteria to your program that parents will love. But more important is the difference your facility can make for the kids enrolled. It is a statistical certainty that several of the little ones in your care will at some point suffer a serious injury, be molested, or even be killed from causes which are prevent-able. You are in a position to change those odds dramatically. Help us ensure that every child gets the protection they deserve.

You can access our material for teachers at www.keepyouchildsafe.org/teacher-resources. We thank you for your time and hope that we can assist your facility with all its child safety needs.

Sincerely,
G.C.F. Staff
